

SLIMBRIDGE PRIMARY SCHOOL RELATIONSHIPS AND SEX EDUCATION

Consultation with our School Community

A series of several parallel white lines of varying thicknesses, slanted diagonally from the bottom left towards the top right, crossing the right side of the page.

New Guidance

- ▶ 20 years since the last review of the curriculum- the world (and how we interact with each other) has changed
- ▶ New- Relationships Education in Primary Schools will be part of the Personal, Health, Social and Emotional curriculum
- ▶ Previous recommendations for teaching Personal, Social, Health Education, are now part of the National Curriculum.
- ▶ Sex Education in Primary Schools remains optional, though in Year 5 & 6 the science curriculum form part of what might be considered as sex education- puberty and reproduction.

SCIENCE CURRICULUM

As part of the Science curriculum we teach the following statutory objectives that build understanding about growth and reproduction:

Year One

Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.

Year Two

Notice that animals, including humans, have offspring which grow into adults they should not be expected to understand how reproduction occurs.

Year Five and Year Six

Describe the life process of reproduction in some plants and animals. They should learn about the changes experienced in puberty

Where and how did you learn about relationships and sex? For young people, their learning comes from...

Mobile phones

TV

Internet

School

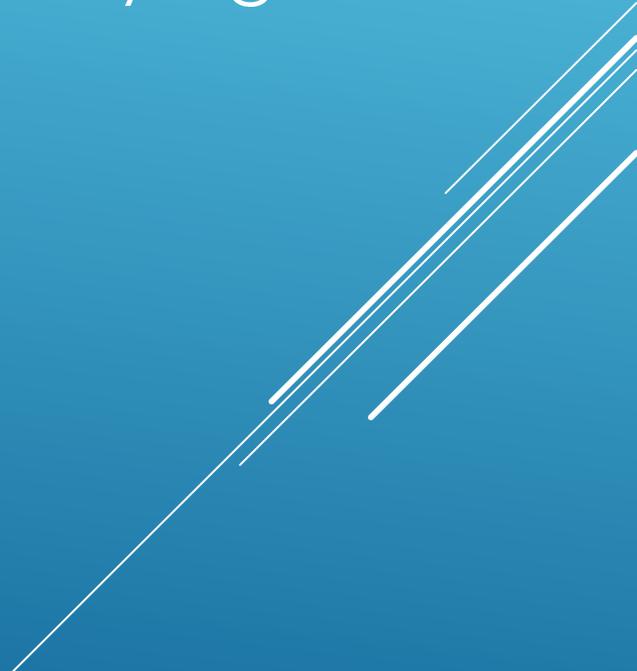

Friends & Older Siblings

Parents & Carers

Why is Relationships and Sex Education important?

- Entitlement
 - Puberty is starting earlier- for some children by age 9
 - Unhelpful misconceptions
 - Safeguarding
 - Grooming
 - Child Sexual Exploitation
 - Abuse
 - Sexting
 - Online pornography
- 

What is effective Relationships & Sex Education (SRE)?

- Age appropriate
- Based on needs of pupil
- Progressive
- Inclusive
- Delivered by trusted staff in a safe environment
- Prepares children adequately for puberty in a timely way
- Prepares children for adult life
- Promotes positive relationships

Does it work? What's the evidence?

Those receiving good quality RSE are more likely to:

- Delay their first sexual experience
- Use condoms for contraception
- Have fewer sexual partners

Kirby 2007

Ofsted review of existing RSE nationally

- Required improved in over a third of schools was not systematic enough
 - Children were not adequately prepared for puberty
 - In Primary Schools, too much emphasis was placed on friendships and relationships
- 
- A decorative graphic consisting of several parallel white lines of varying lengths, slanted diagonally from the bottom right towards the top right, set against a blue background.

Your rights as a parent:

- To be informed of the RSE curriculum and policy
- To be consulted about changes to these
- To withdraw your child from Sex education lessons (that are outside of/ additional to the Science National Curriculum)

Finding out from children about what they already know/ need to know about Relationships and Sex :

- What do they need to know now? (What they view as age appropriate)
- What do they need to know at the age of 11?

Have you asked your child?

Recommendations for Changes/ Schools:

- Introduce children to the correct scientific terms to describe body parts in Key Stage 1
- Challenge the use of 'gay' as an insult and include work around the makeup of different families
- Explore/ challenge gender roles/ stereotypes
- Begin to explore puberty changes by the age of 8/9
- Deliver RSE in a systematic way across the school
- Ensure that children in Year 5 and 6 receive RSE input around puberty so that they are prepared as soon as possible for the onset of puberty
- For some sessions on Sex Education consider single gender sessions

Summary

- Parents have the right to withdraw children from Sex Education lessons at Primary School that go **beyond** the content in the Science National Curriculum.
- Topics covered related and linked to the Science Curriculum are statutory and not optional to teach. This is as follows:
 - In Key Stage 1, children learn that animals, including humans, have offspring that grow into adults. They should be introduced to the concepts of reproduction and growth but not how reproduction occurs.
 - In Upper Key Stage 2 (Year 5/6), children are taught about the life cycles of humans and animals, including reproduction. They also learn about the change that happen in humans from birth to old age. This includes learning about what happens in puberty.
- School's have the right and obligation to teach RSE topic to prepare children for life when they leave school.
- The curriculum on Relationships and Sex Education should complement, and be supported by, the school's wider policies on Behaviour, bullying and safeguarding (PSHE; E-Safety, Relationships etc).
